

Raul Saenz, DDS - Your Smile Expert

Cosmetic, Orthodontic and Family Dentistry Practice Celebrates the Grand Opening of their New Office

By Anna Henry

During an Orthodontic consultation years ago, a mother told Dr. Saenz to do what he would do if her child were a member of his own family. Dr. Saenz took her comment to heart and has practiced this philosophy ever since. After 25 years in practice, Dr. Saenz continues to build lasting, trusting relationships with his patients, and has treated thousands of “extended family members.”

“A patient’s trust is the most important part of my practice,” says Dr. Saenz. “Many of my adult patients started with me as children. It’s very satisfying to know that I am the only dentist they have ever seen, and that they trust me enough to bring their own children to me.”

Dr. Raul Saenz – The Smile Expert.

Specializing in cosmetic dentistry, orthodontics and family dentistry, Dr. Saenz has seated thousands of crowns, performed countless cosmetic and restorative procedures, and has completed more orthodontic cases than he can count. With a sterling reputation, a fun-loving and kind spirit, experience and unquestionable skill, it is easy to understand why Dr. Saenz has become the area’s trusted “smile expert” and dentist of choice.

His new office, complete with a panoramic view of Clear Lake, gives residents of Clear Lake, Friendswood, and

surrounding communities, a chance to experience the same outstanding, comprehensive dental care that Houstonians have enjoyed for years.

“We provide one-stop service. Orthodontics as well as cosmetic and restorative dentistry can be accomplished in the same office by the same doctor,” Dr. Saenz explains. “Patients comment all the time how convenient and valuable it is.”

Convenience, comfort and gentle care for everyone.

When setting up his new state-of-the-art office, Dr. Saenz had a few goals in mind.

As a member of Friendswood Community Church, he selected a nearby location to offer spirit-enhancing smiles to his fellow congregation members, who know him as the lead guitarist in the church band. *“I am often asked at church where my office is located,”* explains Dr. Saenz. *“People were disappointed when I told them it is 30 miles away.”*

His children are excited about his move too. Kemah has a night of rock and roll on their boardwalk called “Rock the Dock”, and they’re proud to say that “Kemah doesn’t have the only doc that rocks; now Clear Lake does.”

An avid fisherman and former president of the local Coastal Conservation Chapter, “Doe Saenz” has forged many great relationships through his passion for fishing. He hopes to better service his fellow fishermen with an office that is now closer to home.

The new office offers a welcoming, friendly environment for everyone, especially busy mothers. The staff makes every effort to provide fast and convenient appointments and to help moms understand ways to keep their children’s gums and teeth healthy - which should result in fewer trips to the dentist!

The practice is also “business person friendly”. *“People don’t want to go to back*

to work with a big fat lip and a numb tongue,” says Dr. Saenz. “I use a unique anesthesia technique for filling, crowning or root canalling one or two lower teeth that doesn’t numb the lip and tongue. Patients don’t feel the anesthetic being applied and love the fact they can eat or go back to work right away. Kids especially like it and moms don’t have to worry about them biting themselves.”

Dr. Saenz and his wife Nomia, an Orthodontic lab technician, have been married for 25 years. She has opened an Orthodontic lab in the same location to provide lab services for Orthodontists in the area.

Enhance your smile with confidence.

Dr. Saenz office uses the latest and most effective dental technologies and techniques, and follows exacting sterilization procedures.

“It is a great time to be a dentist, but an even greater time to be a patient,” states Dr. Saenz.

Dr. Saenz performs cosmetic and restorative dentistry including everything from repairing a single tooth to implant restoration and complete smile makeovers. He offers beautiful, natural- looking porcelain veneers and full porcelain crowns, and has recently starting offering “no prep” veneers that preserve the natural tooth structure.

Dr. Saenz reminds us that it is important to address problems that would ultimately affect the outcome of a smile reconstruction before starting the process, such as a misaligned bite. With full suite of services, he can address many problems without referring his patients to someone else.

The office uses the latest products and technologies, including the newest generation of filling materials and the latest in-office bleaching products that eliminate teeth sensitivity and the need for uncomfortable lip spreaders. Patients benefit from new technology like digital X-rays (radiation exposure is 50-90 percent less than traditional X-rays), which are enhanced with computer imaging software to better detect tooth decay and gum disease. High-tech laser cavity detection can pick up even the smallest of cavities. A tiny intraoral camera is used to capture images on computer screen so patients can view images along with Dr. Saenz. This helps them better understand their condition and recommended treatment.

Comments of Appreciation from Dr. Saenz’ Patients

“Dr. Saenz put braces on my daughter and gave her a wonderful smile. She is now an actress and for her debut in a play, I had Dr. Saenz build a new smile for me with veneers, something I had always wanted to do since seeing my daughter’s great smile. Thanks Dr. Saenz.”
Becky Findley

“Dr. Saenz is a great dentist/fisherman. He gave me an injection in a rocking boat in the middle of the bay to remove a

hook completely buried in my top lip. I never felt a thing and I was able to keep fishing all day.” John Wise, Associate Pastor, Friendswood Community Church

Now you can experience the best in comprehensive dental care.
